New to the Department and the E-zine
by Curt Witcher

Earlier this month, we welcomed a new librarian for the Historical Genealogy Department, Donald Litzer. Don’s most recent previous experience was at the McMillan Memorial Library in Wisconsin Rapids, WI where he served as Adult Services Librarian from 1996 to 1998 and Head of Adult Services from 1998 to 2005. Some of his previous library experience includes five years at the Public Library of Cincinnati and Hamilton County as well as work at Western Reserve Historical Society in Cleveland, Ohio.

In his capacity as head of Adult Services at the McMillan Memorial Library, Don was the library’s liaison with the Heart O’Wisconsin Genealogical Society and assisted in developing their digital collection known as “Local History On-Line.” He also initiated, researched and implemented a project to have more than two thousand pages of previously un-microfilmed Wood County, WI newspapers microfilmed at the Wisconsin Historical Society.

Don has been and is a member of a number of genealogical and historical societies including the Ohio Genealogical Society where he served on their board of trustees from 1993 to 1995 and the Heart O’Wisconsin Genealogical Society where he served as vice-president from 1999 to 2002. He is currently a member of the Wisconsin Historical Society and the Pommerscher Verein of Central Wisconsin. A number of years earlier, Don won the “Genealogist of the Year” award from the Nebraska State Genealogical Society. Don has also self-published a genealogical work entitled, “Roots and Wings: A History of the Danielsson-Carlsson, Bengtsson-Johansson and
Mansson-Johansson Families of Tjallmo and Hallestad Parish, Ostergotland, Sweden, in Sweden and America.”

I look for Don to be a very strong member of the department’s reference team and all of you should look for him as a future contributor to this e-zine.

Also debuting this month is the first “Preservation Tip of the Month.” This will be a regular feature of the e-zine provided by the library’s preservation technician, Becky Schipper. I trust you will enjoy this new feature as a way of quickly learning easy, doable steps to preserving your valuable family documents and treasures.

If you’re looking for a cool place to beat some of the summer heat, remember that a couple of days of researching here in the Historical Genealogy Department might just be what you need to recharge yourself. New materials are being added weekly, making the extant microtext and book collections a wonderful complement to the Ancestry.com, HeritageQuestOnline.com, and NewEnglandAncestors.org subscriptions we have for your use. Come see us on your summer vacation travels.

Place-Name Dictionaries
by Elaine M. Kuhn
******************************************

Have you always wondered how a place got its name? Do family records show that your ancestors were born near Forty-Five, Tennessee or perhaps Henpeck, Ohio, and you have no idea where these places are, or were? The answers to these questions can often be found in place-name dictionaries. The Historical Genealogy Department is home to hundreds of place-name dictionaries or gazetteers.

Arguably one of the most heavily-used sources in the Historical Genealogy Department is the “Rand-McNally Commercial Atlas & Marketing Guide” (912 R15c) which serves as an excellent starting point for identifying county and location information of current cities and towns. Some of the more common types of place-name dictionaries concentrate on a single state, like Ronald Baker’s “Indiana Place Names” (977.2 B17i) and Larry L. Miller’s “Tennessee Place Names” (976.8 M612miL). There are also titles covering specific local areas such as Rhoda Ellison’s “Place Names of Bibb County, Alabama: Abercrombie to Zuzu” (976.101 B47ea) and Henry Steiner’s “Place Names of Historic Sleepy Hollow & Tarrytown” (974.702 T17st).

Some place-name dictionaries specialize in particular ethnic or international origins. “Swedish Place-Names in North America” by Otto R. Landelius (929.182 L233s), for example, discusses the Swedish roots of geographic entities across North America
while William Bright’s “Native American Placenames of the United States” (973.003 B768nat) details the probable origins of geographic names such as Machodoc, Virginia and the Wapsipinicon River of Minnesota and Iowa.

The collection of place-name dictionaries is not limited strictly to the United States. Among the Canadian sources one will find titles such as “Geographical Names of Manitoba” (971.27 G292), Michael Dawber’s “Where the Heck is Balaheck?” (971.3 D32w), and “Noms Geographiques de la Province de Quebec”, 2d ed. (971.4 Q33n). For lands across the Atlantic Ocean, try titles like Adrian Room’s “Placenames of France” (944 R674p) which includes both the location of a place and the origins of its name along with appendices detailing habitative names of residents (people from Paris are Parisiens, residents of Lyon are called Lyonnais) and towns that were renamed during the French Revolution. Another international source worth looking at is the “Cambridge Dictionary of English Place-Names” (942 W3498c) which provides the etymology, historical spellings and pronunciations of place names throughout the country.

The above titles are just a sampling of the numerous place-name dictionaries located in the Historical Genealogy Department. To identify similar sources in the collection, search the Allen County Public Library’s online library catalog at www.acpl.lib.in.us with the phrase “names geographical”; narrow the search further by adding the country or state of interest as in “names geographical Wyoming”. Happy researching!

State Census Records
by Timothy Dougherty
************************************************

The Genealogy Department collection includes many of the state and territorial census records available on microfilm. These are special censuses that were conducted by the states themselves, and are separate from the more widely known Federal census records. The reasons for having taken these censuses varied. Territories and states took them to qualify for statehood, to try to gain additional representation in Congress, and to qualify for special funding projects, among other reasons. A researcher may find clues in these records that are not available anywhere else.

The state censuses are valuable for several reasons. For one, they were conducted in years other than the federal censuses, often in mid-decade (e.g. 1875, 1885), affording a researcher the hope of filling in gaps existing in the federal censuses. By examining an 1885 or 1895 state census, for example, a researcher may pinpoint someone lost because of the destroyed 1890 federal schedules, or checking the 1852 California state census may yield an ancestor in one of the “lost” counties of the 1850 federal census.
Secondly, state censuses often contain questions that the federal censuses do not. For example, the 1895 Minnesota state census asks how long the individual has been a resident of Minnesota, and how long he/she has been a resident of that particular enumeration district. The 1855, 1865, and 1875 New York state censuses list county of birth for natives of New York, and the 1865 Rhode Island census lists town of origin for those born in Rhode Island. Finally, the state census records can help further develop the stories of our ancestors, and may help solve genealogical problems.

Although the Allen County Public library does not house all of the existing state and territorial censuses, it does maintain at least some of the available records for Alabama, Colorado, Florida, Illinois, Iowa, Kansas, Michigan, Mississippi, Missouri, Nebraska, New Jersey, New York, North Dakota, Oklahoma, Oregon, Rhode Island, Washington state and Wisconsin. Not all states conducted their own censuses, and not all counties were recorded or are extant for the ones that did.

Most of the state census material is not indexed, but the Genealogy Department does have indexes for a few states or for individual counties. The vast majority of the state census records, however, will need to be scrutinized line by line. The schedules are generally arranged by county and then by township or ward, so that may make the quest a little easier.
